PROFESSIONAL SUMMARY

Flutter Developer with 1+ year of professional experience building and delivering end-to-end mobile applications using Flutter and Dart. Skilled in translating business requirements into functional and responsive UI, developing scalable features from scratch, and integrating RESTful APIs. Experienced in state management using Provider within Clean Architecture and MVVM patterns. Proven ability to optimize application performance through local data caching, implement data visualizations to improve data visibility and user insights, and deliver secure authentication flows with a focus on usability and maintainability.

TECHNICAL SKILLS

Programming Languages	Dart, Java
Frameworks & SDKs	Flutter
State Management	Provider
Architecture	MVVM, Clean Architecture
API Integration	RESTful APIs, JSON, Dio
Databases & Local Storage	SQLite (Sqflite), Firebase
Data Visualization	fl_chart (Line, Bar, Pie Charts)
Version Control	Git
Tools & Platforms	Postman, Android Studio, VS Code

PROFESSIONAL EXPERIENCE

Junior Frontend Developer (Flutter) — Analogue I Solutions Feb 2025 - Present

- Developed and maintained cross-platform mobile application features using Flutter and Dart, following clean and maintainable coding practices.
- Implemented Provider-based state management and applied Clean Architecture and MVVM patterns to build scalable and modular codebases.
- Integrated RESTful APIs using Dio, including multipart data handling and secure token-based authentication flows.
- Improved application performance by implementing local data caching strategies to reduce redundant network calls.
- Implemented data-driven UI components and visualizations to present complex information in a user-friendly manner.
- Integrated Firebase Authentication and Firebase Crashlytics to ensure secure access and monitor application stability.
- Collaborated with designers and backend developers to deliver production-ready features with optimized performance and smooth user experience.

PROJECTS

TGNPDCL Employee App – Dashboard Module

Enterprise mobile dashboard module providing real-time operational insights to employees.

Tech Stack: Flutter, Dart, Provider, Dio, REST APIs, Sqflite, fl_chart

Architecture: Clean Architecture, MVVM

- Developed data-driven dashboard screens and reusable Flutter UI components.
- Integrated RESTful APIs using Dio with Provider-based state management.
- Implemented local data caching using Sqflite to store frequently accessed data and reduce repeated API calls, improving screen load performance.
- Designed and implemented interactive data visualizations using fl_chart, including line, pie, and bar charts with gradient styling to enhance user experience.
- Optimized UI performance and handled dynamic data updates efficiently.

Tailors Town – Tailor Application

Tailor-focused mobile application for managing orders, customers, and tailoring workflows as part of a dual-app platform.

Tech Stack: Flutter, Dart, Provider, Firebase Crashlytics, REST APIs, Lottie

Architecture: Clean Architecture, MVVM

- Developed the tailor-side application from scratch, owning the complete application flow from initialization to production-ready features.
- Implemented centralized navigation using named routes to ensure clean and maintainable navigation flow across the application.
- Integrated RESTful APIs, including multipart data handling for store registration and logo image uploads.
- Implemented Provider-based state management to support scalable and modular feature development.
- Integrated Lottie animations to display smooth loading indicators and improve overall user experience.
- Integrated Firebase Crashlytics for crash monitoring, runtime issue analysis, and application stability.

Chaarvi Grow – Plant Disease Detection Application

Mobile application that detects plant diseases using image analysis via backend services.

Tech Stack: Flutter, Dart, Firebase Authentication, Dio, REST APIs

- Implemented end-to-end authentication flow from app launch to home screen.
- Integrated image capture and upload for backend disease analysis.
- Displayed disease prediction, severity levels, and prevention guidance.

EDUCATION

2019 – 2023 B.Tech in Computer Science, **Vidya Jyothi Institute of Technology** (GPA: 7.75)

2017 – 2019 MPC, **Vijetha Junior College** (93.2%)

2016 – 2017 SSC Board (GPA: 8.0)
